## INTRODUCTION

PART I, THE DATA

A. The Two Varieties of Phenomena. 3
B. All Attitudes are Propositional Attitudes. 23
C. A Standardized Language for Reporting Beliefs. 43
D. Pep Talk; Then The Adicity of Propositional Attitudes and their Contents. 61
E. A Standardized Logic for the Reports' Entailments. 83
F. Modalities and Propositional Attitudes: How Alike? 103
G. The Opacity and Hyperintensionality of That-Clauses. 123

PART II, THEORIES OF THE ABOUTNESS

H. The Sufficiency-of-Concurrence Theory of Relational Reports Refuted. 145
I. The Indispensability of Causal Rapport for Some Relational Attitudes. 165
J. If Reports of Relational Belief are Context-sensitive, Are They Unscientific? 183
K. Paradoxes in the Concurrence+Rapport Theory of Relational Reports. 203
L. The 1968 Solution to the Paradoxes and Its Aftermath. 215
M. Beliefs About Oneself and About the Present Moment: the Data. 235
N. Beliefs About Oneself and About the Present Moment: the Theories. 255
O. The General, Unified Theory of Relational Beliefs: Ellipsis+Dominance. 273
PART III, THEORIES OF THE DIRECTED-TOWARD-NESS

1st Subpart. Mind is Directed Toward Representations.
P. Do We Believe Predicates and Sentences? 301
Q. The Adverbial Theory of Directed-Towardness. 331
R. Do We Believe Connectionist Representations? 351
S. Do We Believe Semantically Narrowly Individuated Contents? 371
T. Quine’s Arguments against Non-notional Perception. 397
U. Empathy, Not Ostension of Things, is the Primal Root of Discourse. 415

2nd Subpart. Mind is Directed Toward Something other than Representations.
V. When Believing the Same Thing Means Agreeing. 433
W. Singular Sentences and Singular Propositions. 455
X. Two Approaches to Hyperintensions. 481

PART IV, THE NATURALIZATION PROJECT
Y. The Prospects for Naturalizing the Science of the Mind. 499
Z. The Most Promising Philosophical Method. 529

GLOSSARY 553
WORKS CITED 573
INDEX OF TERMS 591
Acknowledgments

My thanks to my students at Western Michigan University: Stephanie Fisher in 1993 and Kristin DeKam, Joseph Uhl, and Rachael Cabasaan in 1997, and Marshall Willman in 1998, for reading earlier drafts of various sections and patiently teaching me the art of writing clearly. In 2000 I discerned the salutary effect of the participants in my course on desire and belief: Craig Carley, Max Goss, Brian Mandock, Brian Spires, and Yang Ming (Michael); also Professors Amita Chatterjee and David Newman. Professor Pranab Kumar Sen influenced my account of substitution in section E and forced me to see the need for section Z to defend a conception of philosophical method that emerges, starting in section H and continuing in parts III and IV. In 2001 Max Goss continued to provoke me to think about how to respond to his deep criticisms. In 2002 colleagues Marc Alspector-Kelly, John Dilworth, and Insoo Hyun helped me, as did my students in my course on desire and belief, especially Timothy Sherman.

In this second edition most sections are revised, and for the thoughts that led to the revisions I thank my students in 2004, especially Eric Hatleback, Quentin Gee, Chris Ragg, Ben Gray, and Cheryl Fitzgerald. I thank my students in 2007, especially Adam Bendorf whose puzzlements prompted several improvements, and also Marcus Adams, Lane DesAutels, Kevin Dewan, Jeremy Green, Brennan Jacoby, Matt Love, Amanda Marshall, Dan McCulloch, Kris Phillips, Spencer Smith, and Sarah Stangl.
