

By coming to Western Michigan University I hope to learn about business so that I may start my own business some day. I also hope to make new friends and meet many new people. By coming to the business college I hope to learn about business around the country and also learn what I need to do to succeed in the Business world today. Because business is always changing I need to learn what needs to be done to keep my business successful. By completing four years at Western Michigan I hope to have learned what I need to know to become successful in business. I know I will have to learn a lot more once I leave college but that should all be real world training.
