

On a personal level, I want to develop into a strong person. I want to discover the world around and figure out what I need to do with my life. I want to make many friends. Also, I want my presences at Western Michigan University to make a difference.

On a professional level, I want to learn all that I need to have a successful career. I want my education to help me find a career that I will enjoy and find a job in it. I plan on majoring in business, but not sure what yet. I also plan to do well academically; graduate with honors is my goal.
