

## Slaughterhouse Five by Kurt Vonnegut

Kurt Vonnegut is a funny guy. Weird but funny. In Slaughterhouse Five a novel about a whole bunch of stuff, mostly it is about this young soldier name Billy Pilgrim who has these weird experiences with: spaceships and time travel and war and Germans, he also sees the destroying of Dresden a German town during world war 2. He becomes an eye doctor later. After the war. I'm not sure what it is supposed to mean, I guess it is supposed to teach us that war is bad, I guess.
